-

Projects Accomplished

Anadolubank

E-ihale, Ehaciz : They are developed with java. Jdeveloper, Axis2, Jaxb, Digital Signature, Soap are used.

SCP(Source Copy Project): This project developed for source control for oracle programs (i.e. fmb, rdf, pll, sql, packet, procedure ..) and for to achieve secure and fast deployment. New project starts on SCP, and it publish to development,test,preprod and prod environments. SCP is able to compile Oracle Forms, Reports, PII, Olb files and also able to compile Oracle DDL and DML(procedure, package, functions, insert, update,delete..) scripts. So all these things gave us fast deployment and it decreased production deployment failures. Jdeveloper+swing, Jdapi,Oracle are used.

Finecus – Bank Risk Management Solution for Anadolubank Turkey and Nederland : FINECUS is a risk management solutions company that has a focus on the sector to provide solutions for Market Risk, Credit Risk, Operational Risk, Asset-Liability Management, Integrated Risk Management, Enterprise Risk Management, Pricing and Scoring

On Marbas(Banking Software Program) : enhancement and maintenance for Anadolubank Turkey Operations and for Anadolubank Netherlands.

**MBG
(Sabah/ATV)
